# Always informed, at any time and place: Digital Solutions

With Truetzschler technology, you can further extend your lead - also in the course of digitisation. Our digital solutions do more than just inform you about the performance of your cards at any time or place. They allow you to optimize processes in your spinning mill with little effort, bundle resources and save costs. They can be easily installed on your PC or Smartphone and function even if you do not exclusively use Truetzschler technology.

Watch video:

## My Mill

The all-in-one platform:  
Whether information about your production, quality, maintenance or simply a complete overview - with My Mill your possibilities are almost limitless.

Watch video:

## My Production

Knowing what is going on at home:  
The extension to My Mill is the ideal companion for managers on the go. You are fully informed via the app practically anywhere on earth and can intervene as necessary.

Watch video:

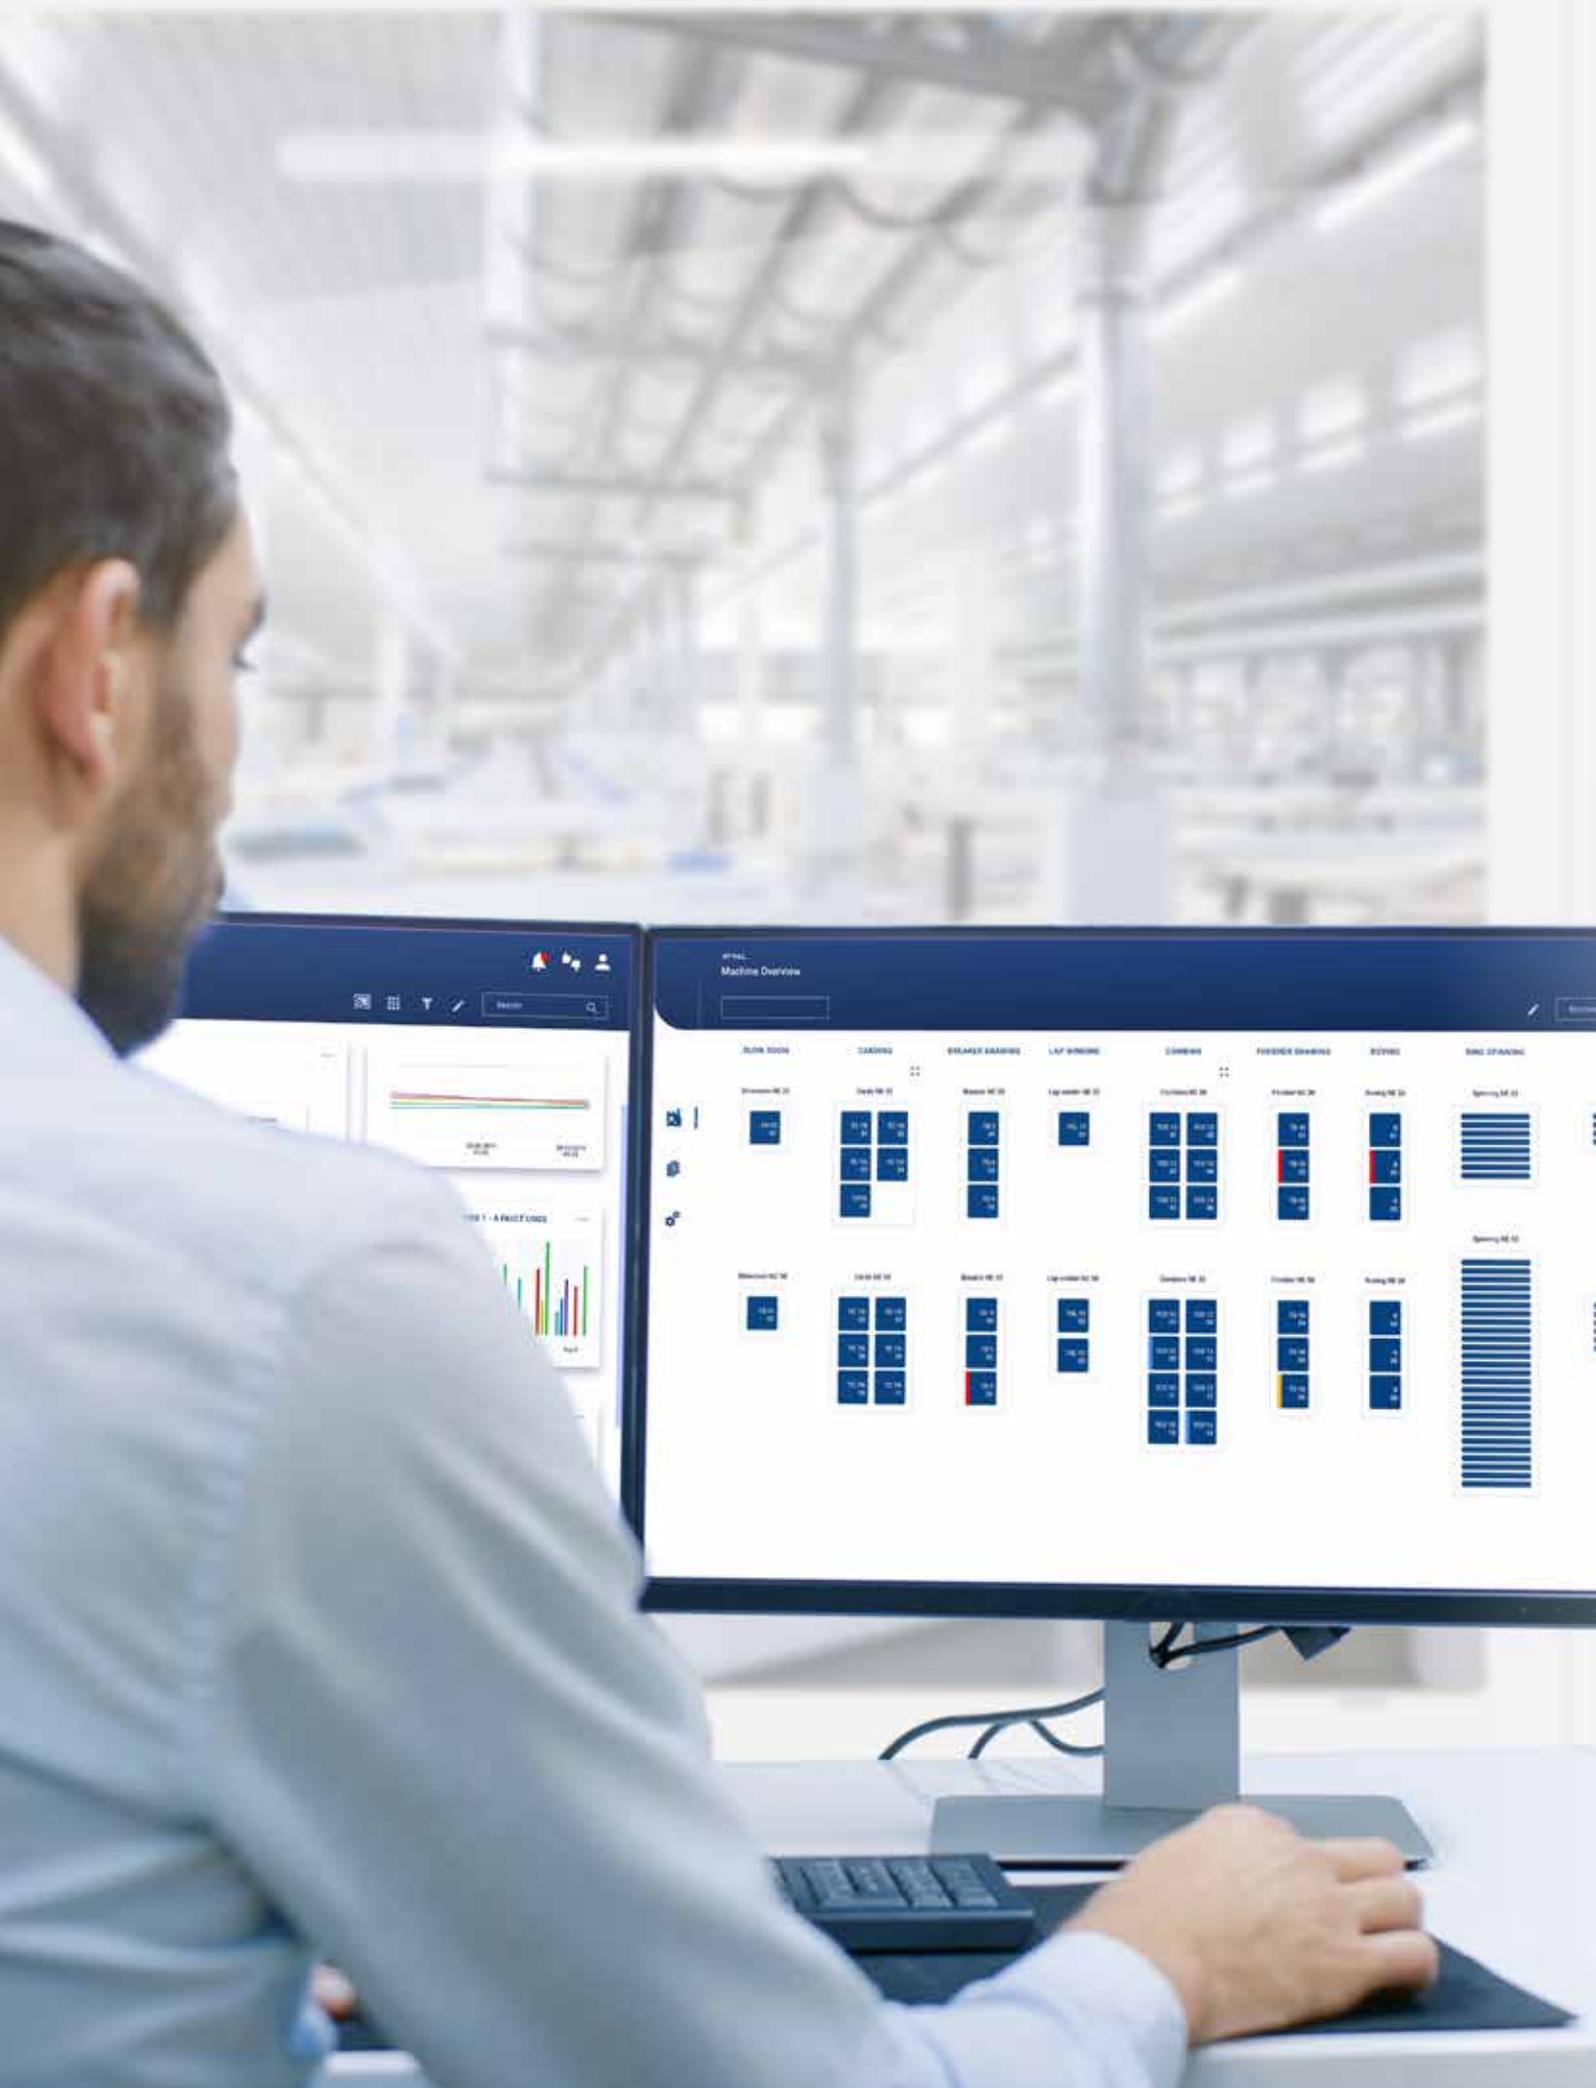

## My Wires

Your digital clothings management:  
Digitise your clothings and their condition in just a few minutes! Receive automatic reminders of pending repeat orders and maintenance via the My Wires app.

Our digital offers are cloud-based and extremely secure. We rely solely on the highest security standards because data security is just as important to us as it is to you.

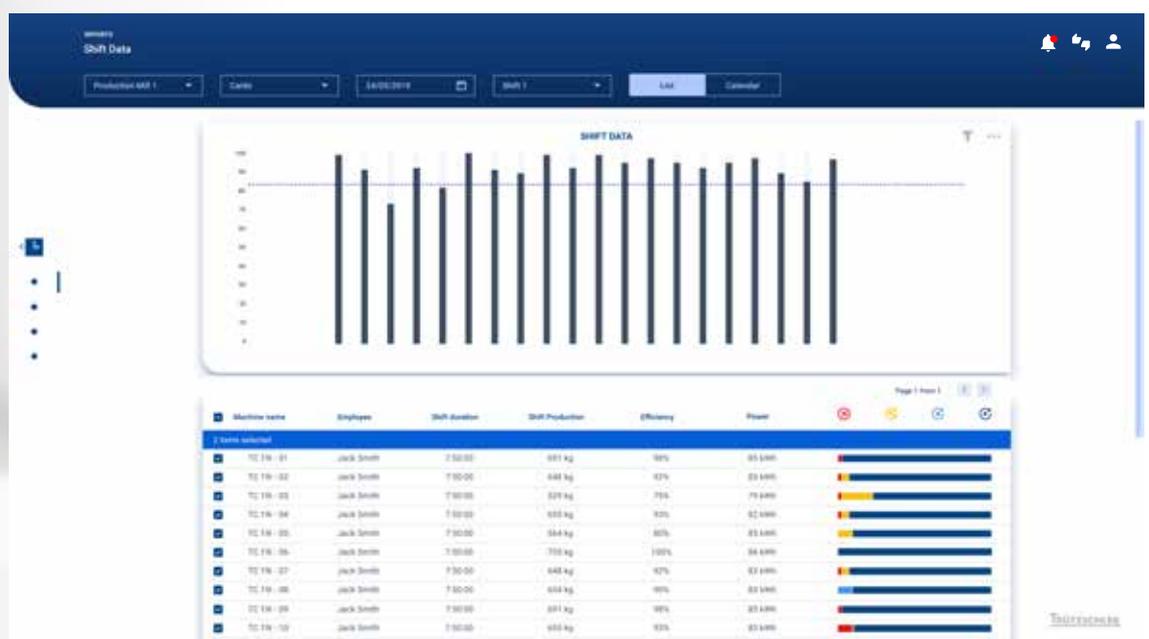

## The all-in-one platform

My Mill offers you a transparent view of your entire spinning mill and helps you with the digital transformation of your processes.

Achieve quick wins from day one and make informed, data-based management decisions.

Our Mill Monitoring System “My Mill” enables you to generate profits faster, bundle resources, optimize processes and save costs. My Mill consistently relies on the highest security standards, because the security of your data is extremely important to us.

My Mill is web-based and works perfectly on all screen sizes and devices. Therefore you are always well informed and able to take action at any time.

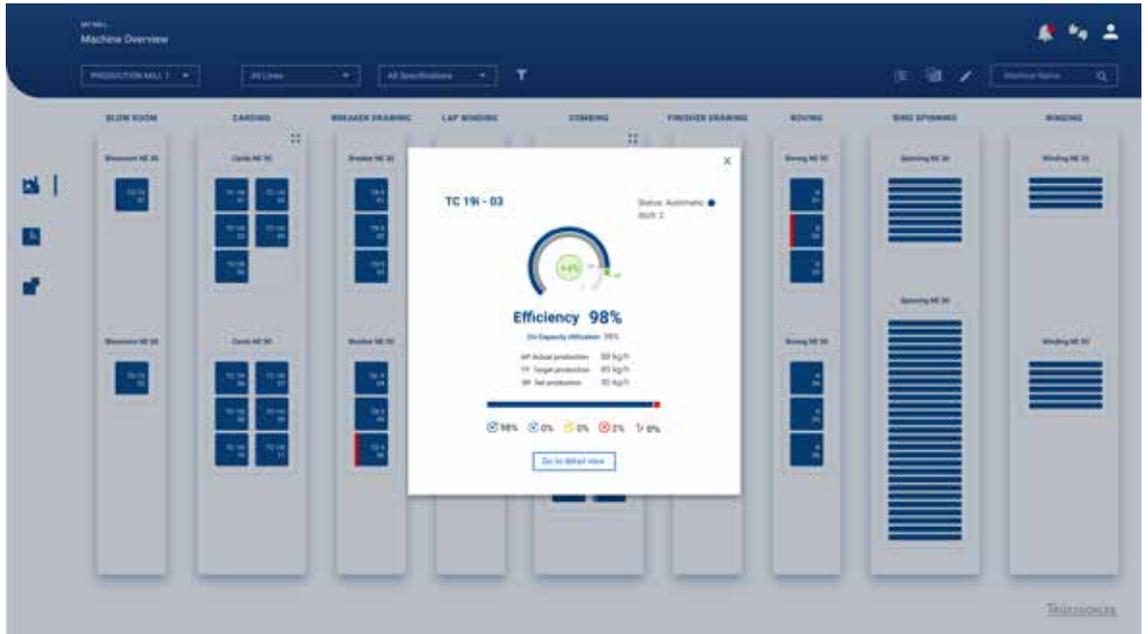

Work time savings due to efficient collection and analysing of shift data.

# Experience full transparency from the beginning

The My Mill Monitoring System shows all current information at a glance.

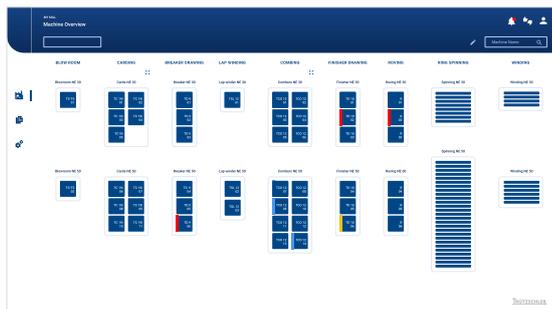

Current machine data in real time

Whether information about your production, quality, maintenance or simply a complete overview - with My Mill your possibilities are almost limitless: from the complete installation to production lines to detailed analyses at machine level, everything is possible.

Through the detailed analyses with My Mill, you can guarantee a consistently high quality in spinning preparation; because this is where the quality of the end product is produced.

Overview of the entire installation

Faster detection and elimination of malfunctions for consistently high quality.

# Optimization

Focus on what's important.

An easy to understand data preparation enables you to discover optimization potentials immediately and to plan your resources sensibly.

Fault statistics, shift data and quality comparisons provide a solid entry point. In addition to Truetzschler machines, My Mill can also be used for data from other manufacturers.

Truetzschler sees itself as an innovation leader and is constantly expanding the scope of cloud-based software. Of course, My Mill provides you with the possibilities of the latest AI systems. In the future, for example, it will be possible to predict the failure of certain components and extremely simplify complicated processes through the automated evaluation of a single photo.

# MY PRODUCTION

## Well informed throughout the world and around the clock

As a manager, you are often on the road. Nevertheless, you want to be up to date about your current production – regardless of locations and time zones. My Production gives you this freedom: You can view the current production at any time, anywhere, and take action as required.

My Production is the perfect extension to My Mill. Find out about your current production with just a few touches on your Smartphone. You receive an overview of your complete installation right up to detailed information on machine level.

We have attached particular importance to the intuitive operation of the My Production App. Like all our apps, My Production meets the highest security standards and is available as a free download from the Apple AppStore, the Google Play Store and the Chinese My Apps Store.

Direct contact with  
person in charge

Production data  
in real time

Insight, ranging from  
the unit to the  
individual machine

Transparency across  
the entire spinning  
preparation

Secure, encrypted  
communication

Simple and clear  
operation

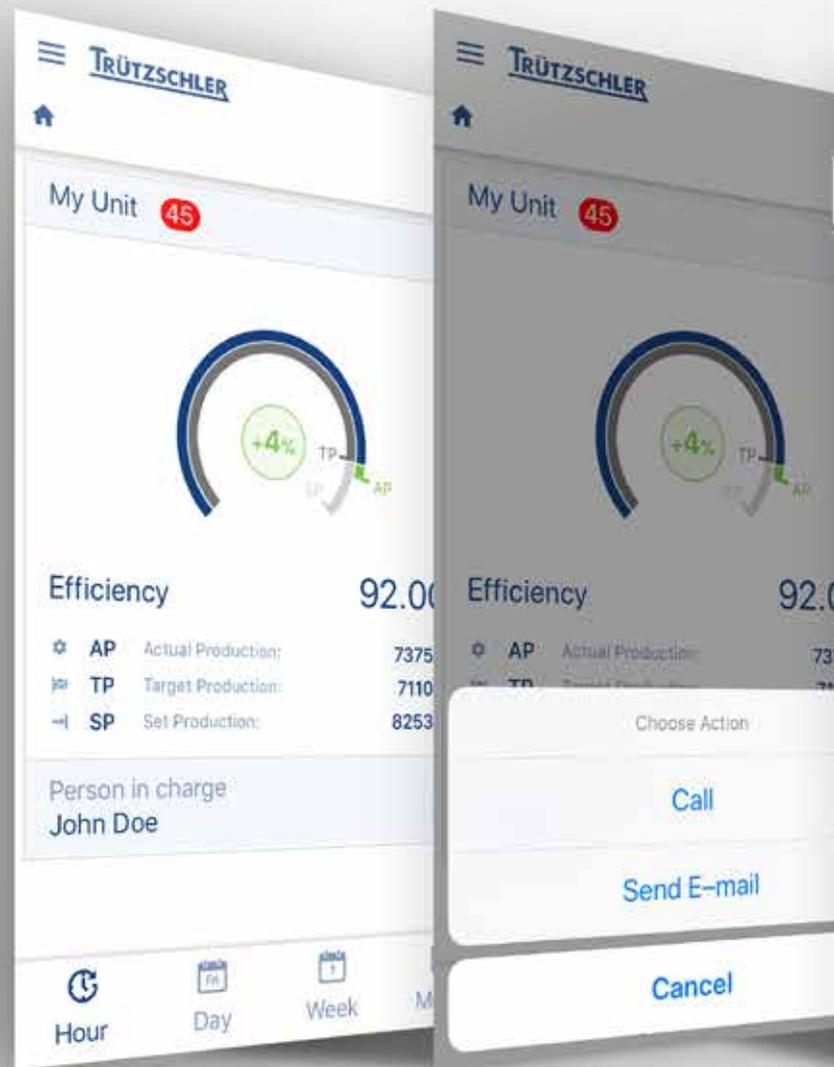

# Everything is OK

Track yarn quality where it's defined – in the spinning preparation.

A single system for all data is clear and saves time.

Higher efficiency due to reduced machine downtimes.

To download the My Production App, scan the QR code.

At a glance: Summary of the production data at the highest level.

Direct contact with person in charge of production by phone or e-mail.

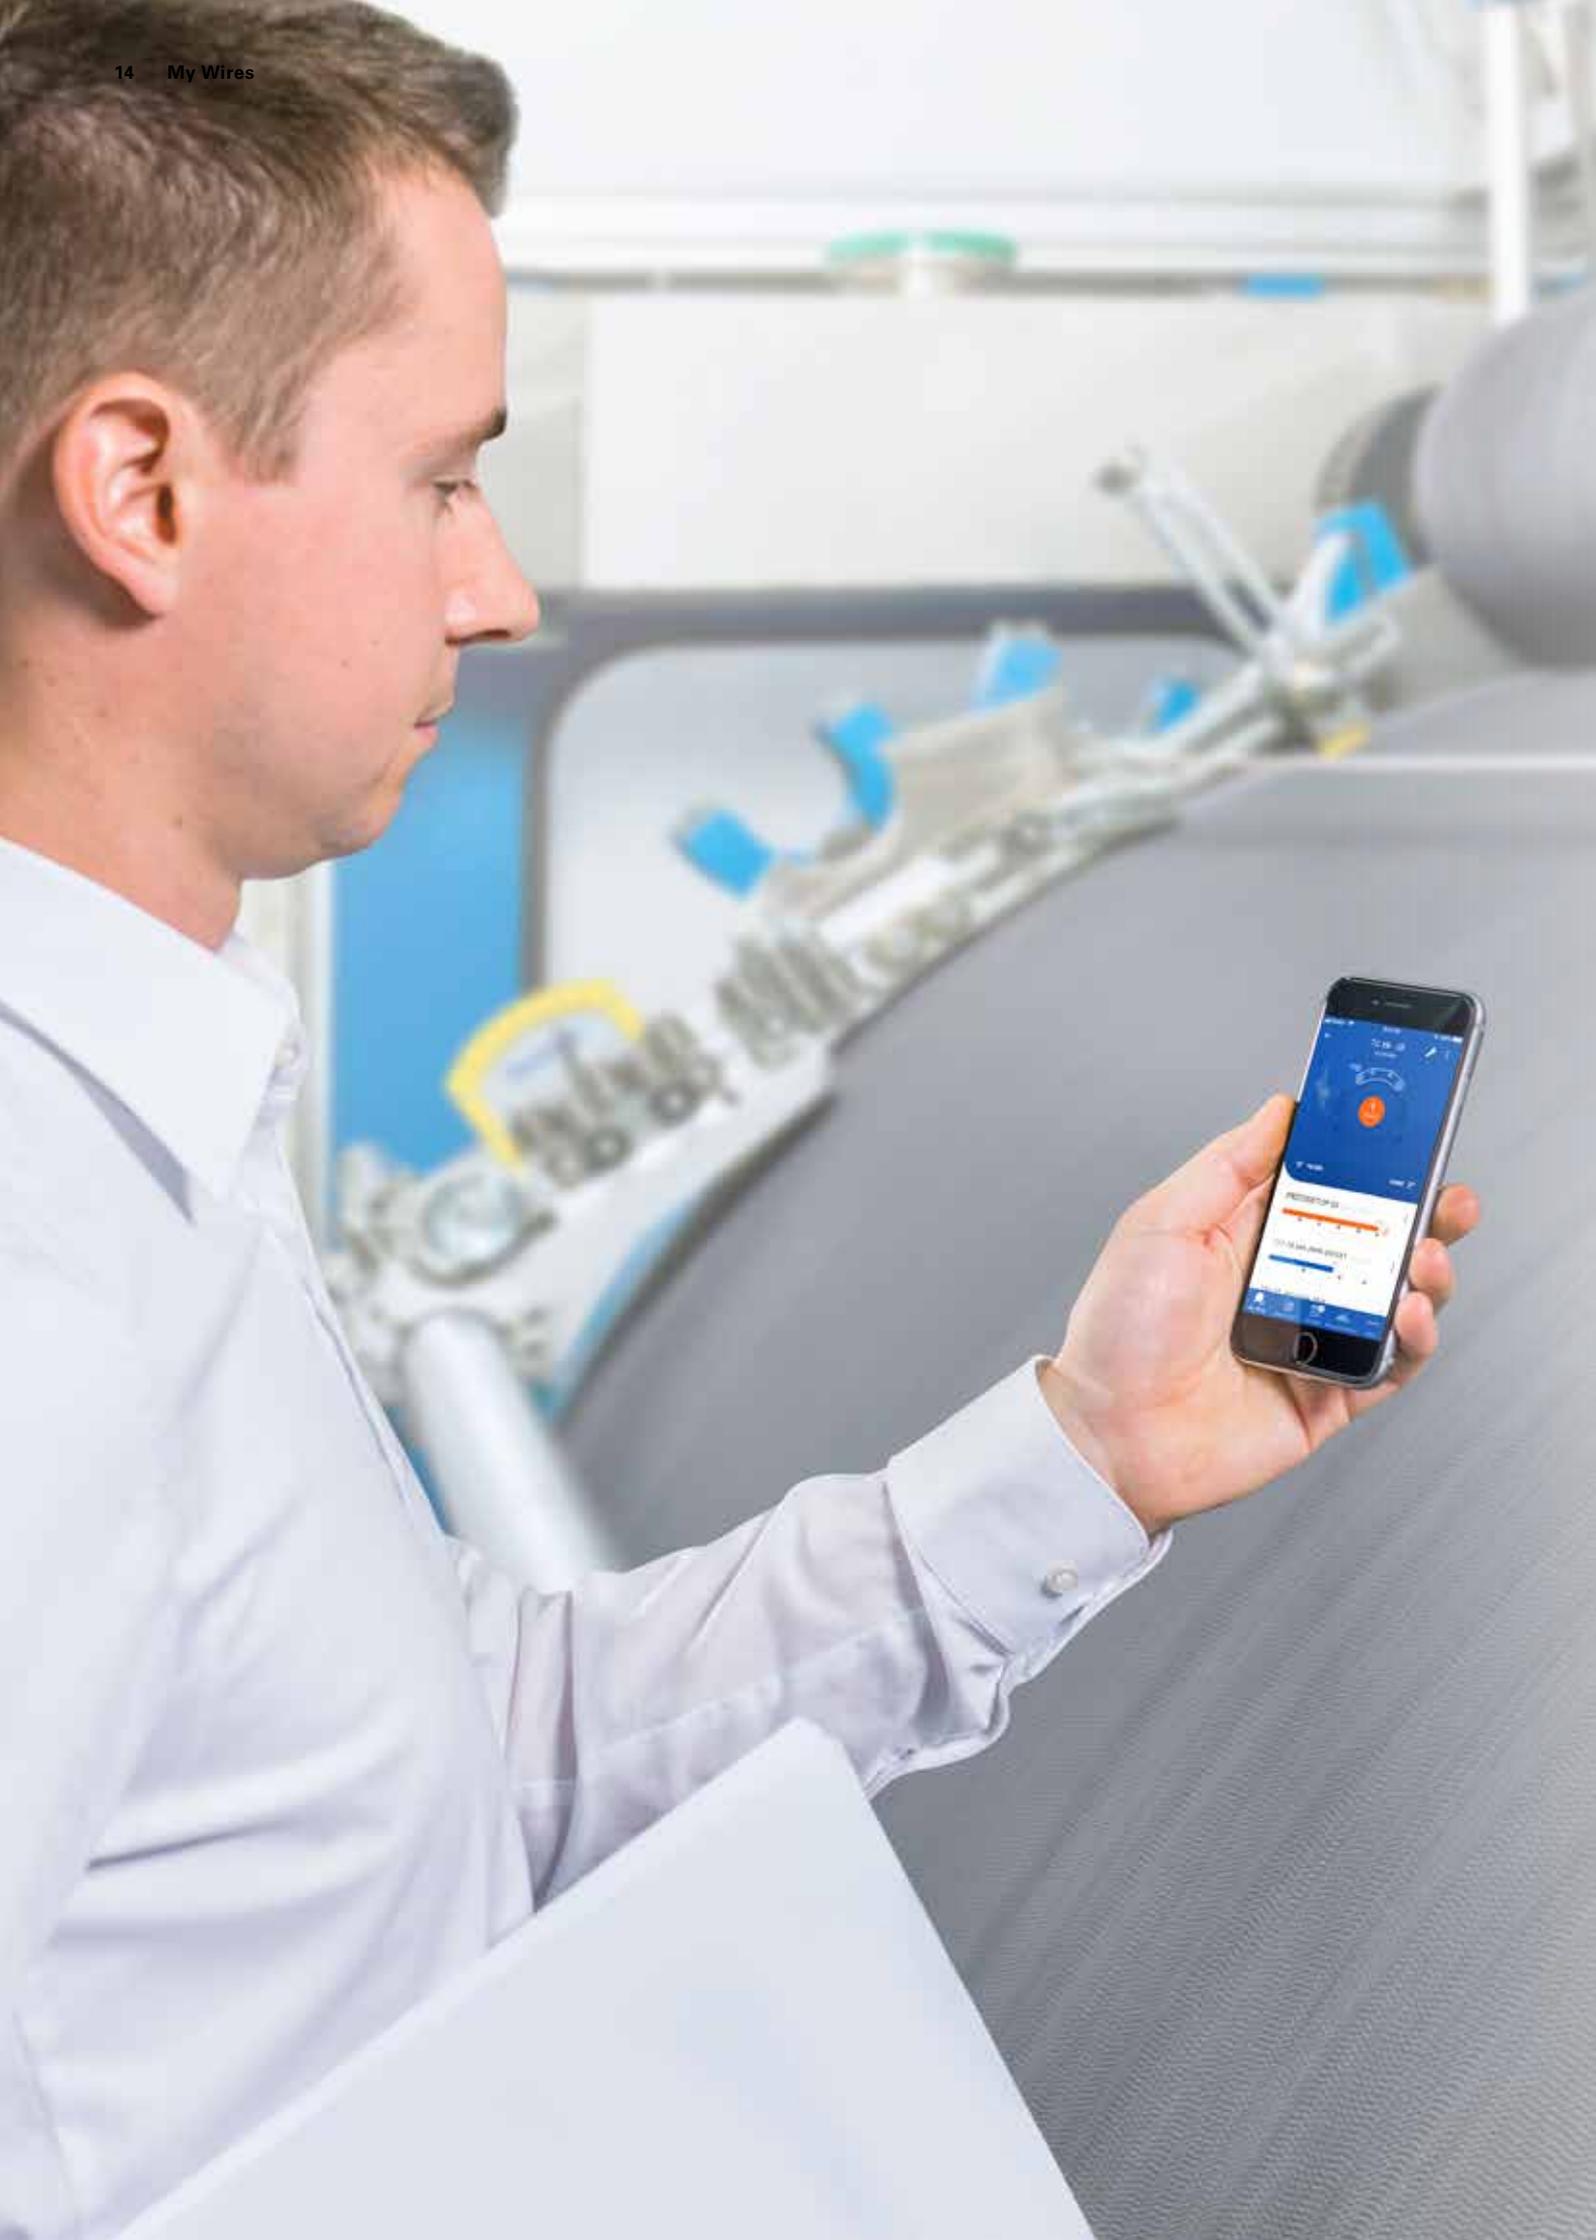

My Production is not a complicated analysis tool. You can see at a glance whether everything is running optimally in your production or whether there are problems. The visual key to this is a simple colour code: Green means "everything is OK", red indicates "take action now". The entire handling of this app is just as easy, so that you simply feel well informed.

All machine data are updated in real time.

Drill-down:  
Detailed information on each individual machine.

Process-oriented:  
Machine groups sorted by processes.

# MY WIRES

## Your digital clothing management

Digitise your clothings – and use My Wires app to gain an overview of central topics of your clothing management, such as clothing condition, service and maintenance.

The starting point is the unique digitisation of your clothing management. This only takes a few minutes – with Truetzschler clothing and Truetzschler machines, just a few details are needed and you are ready to go. The My Wires app can also be used for machines and clothings from other manufacturers.

Once set up, you can use the My Wires app to manage all tasks related to your clothings.

You can see at a glance when and where the next maintenance assignment is due. You can adapt the Truetzschler recommendations for grinding and clothing change to your own experience. Orders can also be easily organised and implemented.

! Use free of charge

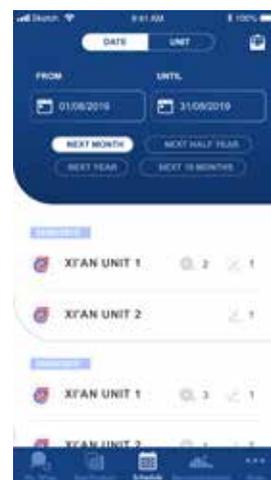

! Truetzschler and competitor products

Unit overview:  
the clothing management of the entire installation at a glance.

Wire overview:  
the status of individual clothings down to the last detail.

Spare parts planning:  
Clothings to be ordered are listed, e.g. per period and unit, and optionally sent as Excel file to your e-mail address.

# Scheduling maintenance

Finding the optimum moment.

The processing of different materials also leads to different clothing wear. In combination with your quality requirements for the spinning process and the end product, this results in the time for planned maintenance work. With the My Wires app you can easily

reproduce material changes digitally and thus plan the optimal time for maintenance in advance. In addition, the maintenance work can be very easily documented with the My Wires app and permanently traced.

# Organising reorders

Ensuring permanent availability.

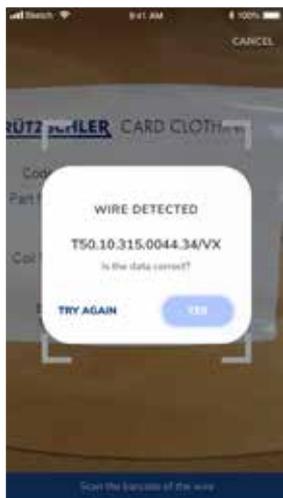

To allow you to concentrate fully on your core tasks, My Wires will notify you with push messages if you wish. This applies to maintenance, but also to the reordering of clothings. You decide how much lead time you need. When replacing a clothing, simply scan the

product label of the new clothing using the My Wires app. The clothing is automatically recognised and the corresponding data entered in a logbook.

Individual notifications for maintenance at the optimum moment saves time.

When replacing a clothing, you only have to take a picture of the product label of the new clothing. My Wires shows you the recognised clothing and logs the corresponding data.

Upon request, My Wires will also inform you about new products.

# Utilising know-how

Access to comprehensive knowledge.

With the My Wires app we offer you a comfortable and future-oriented tool in which our know-how about the interaction of machine and clothings is integrated. At the same time, as a service-oriented partner, we rely on close

customer contact. My Wires is of course free of charge and can be easily combined with competitive products.

To download the My Wires app, scan the QR code.

My Wires is also available as a website. In the web version, the camera and phone book are deactivated.
